### Hot Hardware!

Surfing the web—safely—becomes more important every day with the explosion in the number of phishing and other web sites focused on stealing personal and financial information from your system. Stealth Surfer is one of the best—and most cost-effective ways we've seen to protect you and your data— combining privacy and surfing software and a USB flash drive for storage. Find out more about these slick,, small devices here.

### Hot Finds!

Using "traditional" tools like Macromedia's *Flash 8* to add flash animations to a home-business' web site can be costly (\$699.00 for the Professional Version) and time-consuming while you figure out how to use this powerful, yet complex software. e-frontier offers a cost-effective and simple alternative (\$49.99) in *Motion Artist 2*, our September "Hot Find".
