A Smart Phone That's “Extra Smart”

my Favest phone

As a business owner, you probably have more than one email address (the editor of this newsletter has six!). So Research In Motion (the makers of BlackBerry) came up with the BlackBerry Pearl 8100. Not only can you combine 10 personal and work address for automatic delivery, it also includes a 1.3 megapixel camera, Bluetooth wireless and More!

Hot Finds!

Most folks are better talkers than typers. Therefore Nuance's Dragon NaturallySpeaking Preferred 9 can be a huge help in speeding up the creation of documents, email and other text. With a vocabulary of more than 300,000 words, this software really “works”. Find out why it's our “Hot Find” for October here.
